

// QUANTIZED MUSIC – BIO //

Forward thinking. Visionary. Exploring. Movement. Sound . . . all words that properly define Quantized Music. More than a label, Quantized is a collective of world-class sonic innovators positioned at the forefront of the future of underground dance music.

Quantized Music

Born in Athens, Greece 2007, not by corporate men in business suits seeking “fortune or fame,” rather by two artists who make music, play music and believe in the power of music. Spearheaded and run by Tolis Q and Alex (Lex) both producers, DJ’s, respected leaders and music aficionados with an eye for talent and an ear for quality.

Originally known for hitting international success from a hit track called “Linda (feat. Metrika)” by Siopis, a release that established a formidable reputation that Quantized has been steadily embarking upon ever since.

The Quantized “family” is selected with thought and consideration opposed to choosing releases for “one-hit wonder” manufacturing. Quantized is comprised of seasoned craftsmen and virtuosos such as infamous artists like Siopis, Echonomist, Softcash, Ekkohaus, Fog, Alex Dimou and David Kassi. An artist roster that serves up the freshest house and techno, distinctively rich in deep grooves, smart textures, elegant dance floor beats with uncompromising focus on musicality beyond the simple boom.

As of late, the Quantized momentum has only continued to blossom, with broadening its endeavors outside Athens to the global industry at large. Quantized music has undoubtedly established a solid reputation already as one of the most dynamic authorities pushing the boundaries and breaking down walls in the scaffolds of the underground. - J. Hill ©2013, *The Writing Studio NYC*
